Thisizit Design - Onsite, Hybrid or Remote Depending on Contract **Freelance Web Developer / Graphic Designer / Multimedia Specialist /** **Technical & Social Media Consultant** **2000 – Present**

- Currently creating social media content and providing consulting for online growth, audience development, and platform strategy.
- Technical consultant guiding teams in agile workflows, cross-functional collaboration, and full-cycle digital production to improve overall efficiency.
- Extensive experience in branding, graphic design, photo editing, web design, offset printing, color correction, on-site press checks, and video and audio production and editing.

EVERFI, LLC - Full Time - Remote (Acquired by Blackbaud in 2021; **Sold to a Private Equity Firm in 2025)**

Front-End Engineer Staff **2017 – 2025**

- Maintained and debugged legacy e-learning courses built in Angular, collaborating with QA and cross-functional teams to resolve bugs.
- Developed responsive e-learning courses using YAML, JSON, JavaScript, and SCSS, versioned in GitHub and deployed to an in-house LMS via AWS pipelines.
- Ensured Section 508 accessibility across course templates and UI components.
- Served as Tech Lead in Scrum ceremonies, advising content, UX, and design teams on development feasibility, constraints, and implementation.
- Contributed to an in-house CMS built with JavaScript, React, and TypeScript alongside senior front-end engineers; testing performed with Jest.
- Security monitoring and remediation using Checkmarx, Mend, and Nucleus
- Gained Quality Engineering experience writing Cypress tests in Modello, troubleshooting and resolving front-end bugs across the product lifecycle.

Workplace Answers - Full Time - Hybrid (Acquired by EVERFI in 2017)

Web Developer / Graphic Designer / Video Editor **2013 – 2017**

- Designed visual assets in Adobe Photoshop and Premiere; developed responsive, Section 508-compliant e-learning courses using HTML5 and CSS within an in-house CMS built for scalable course production.
- Created interaction specifications, asset requirements, and UI guidelines supporting both internal teams and external vendors.
- Trained a hybrid team of in-house and contract designers and developers, maintaining design standards, content alignment, and clean code practices.
- Produced and maintained process documentation and coding standards that reduced production errors and increased overall team efficiency.
- Collaborated with instructional designers, project managers, and SMEs to ensure accurate content integration and a cohesive learner experience.

Flatirons Solutions - Full Time - Onsite

Technical Illustrator **2011 – 2013**

- Produced isometric and diametric 3D CAD illustrations and converted them into optimized 2D technical assets for Honeywell aviation documentation using IsoDraw, adhering to a detailed 400-page style guide.
- Added callouts, annotations, and exploded-view details to support maintenance manuals and engineering documentation of mechanical and electrical data.

Multimedia Specialist / Audio Editor **2009 – 2011**

- Developed motion graphics and interactive elements for e-learning modules using Adobe Flash, ensuring smooth course navigation and instructional clarity.
- Recorded, cleaned, and edited high-quality voice-overs in SoundForge to support multimedia training materials.

Graphic Designer / Desktop Publisher **2008 – 2009**

- Implemented InDesign automation for large-scale training manuals, building templates, master pages, paragraph styles, and XML flows that streamlined the production pipeline and increased daily output from 50 to 300 pages.
